

Carbon Reduction and Carbon Footprinting Policy

AmeyBriggs recognises that the energy, products and services it uses cause emissions of greenhouse gases (GHGs) to the atmosphere, resulting in climate change.

As part of its commitment to sound environmental management, AmeyBriggs is committed to becoming net zero by 2050.

AmeyBriggs will:

- Ensure compliance with all relevant legislation
- Manage energy consumption
- Carry out annual surveys to assess our progress against our targets and identify future energy savings and areas for waste minimisation
- Audit all policies to ensure that they are aligned with our net zero strategy
- Promote its carbon ambition to stakeholders and work with partners to reduce GHG emissions across the value chain
- Promote our net zero ambition to employees and raise awareness of how to reduce GHG emissions within their roles.

This policy will be reviewed annually and/or when changes occur that might impact the policy.

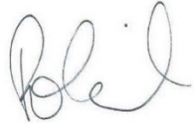

Actions taken to date include:

- publishing a carbon reduction plan for GHG emission reductions, setting a base year and clearly outlining scope and methodology
- introducing staff training to outline the company's ambitions and to raise awareness of energy efficiency
- Looking to transfer energy contracts so that all electricity supplied to offices is 100% renewable

- Reviewing travel policies to reduce emissions associated with business travel.

The person responsible for the implementation of this policy is SHEQ Lead and Compliance Manager.
